

KNIME GitHub Submission Evidence

Asynchronous Activity 1

STUDENT

Alvin Panio

COURSE AND SECTION

CS0065 - AN43

DATE

18 September 2026

Evidence included

- Completed KNIME workflow with three classification models
- Git commit and successful push record
- Anonymous browser verification of the public repository
- Demo folder contents and final evidence PDF availability

PUBLIC REPOSITORY

<https://github.com/acespades15/Panio-Alvin-CS0065-AN43>

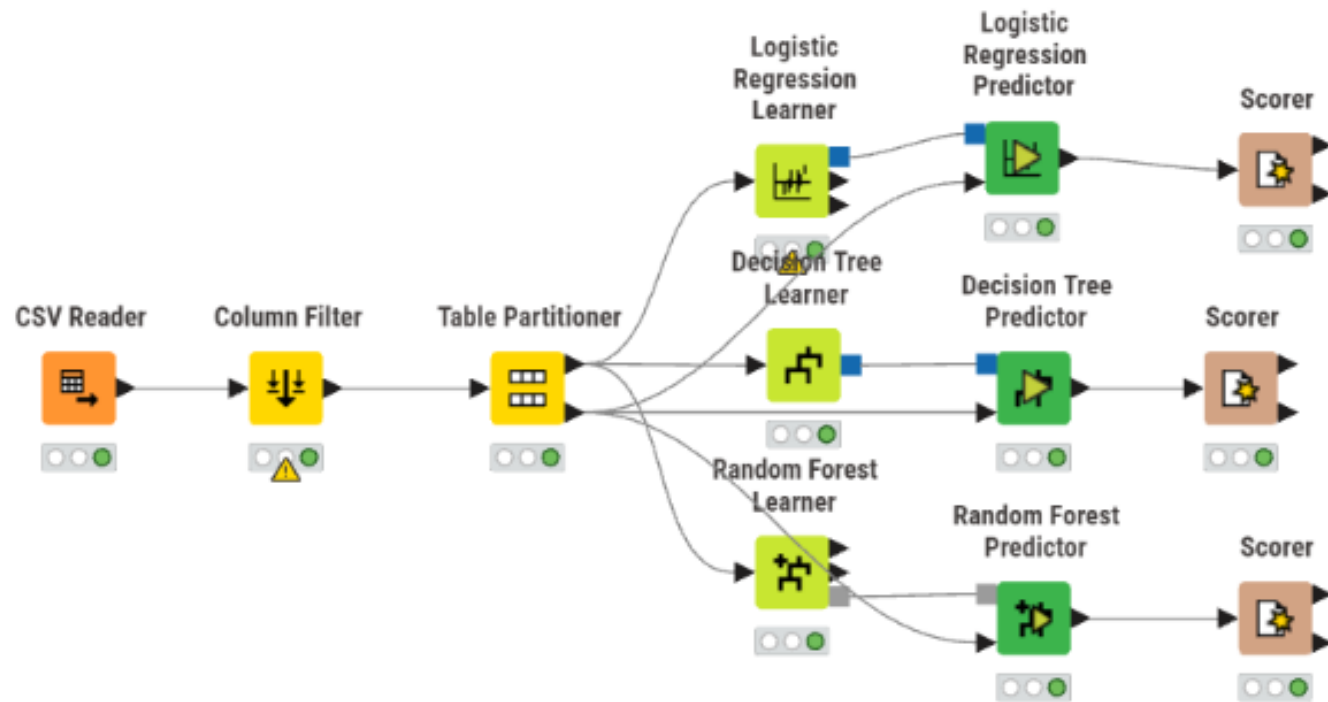

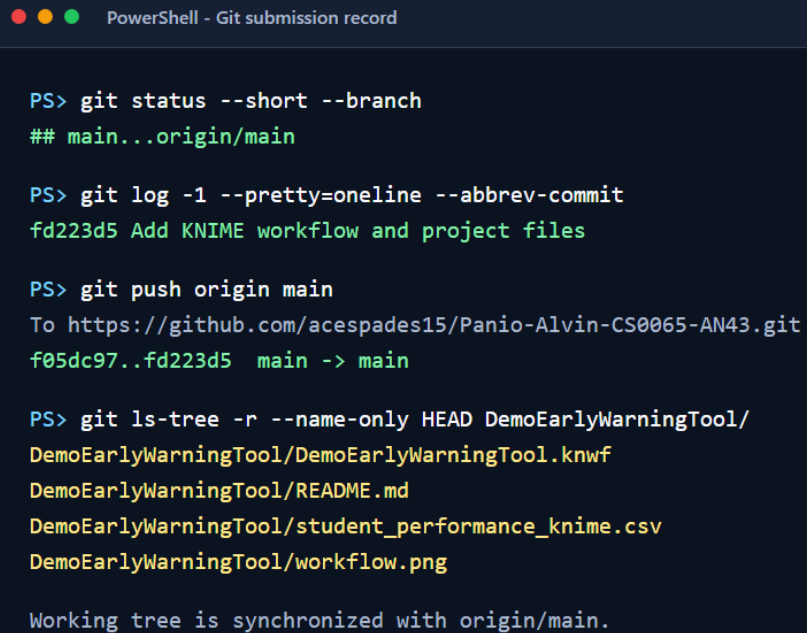

Figure 1. Completed KNIME workflow

CSV Reader and Column Filter feed a Table Partitioner. Logistic Regression, Decision Tree, and Random Forest each connect to a Predictor and Scorer. Executed nodes show green status indicators.

```
PS> git status --short --branch
## main...origin/main

PS> git log -1 --pretty=oneline --abbrev-commit
fd223d5 Add KNIME workflow and project files

PS> git push origin main
To https://github.com/acespades15/Panio-Alvin-CS0065-AN43.git
f05dc97..fd223d5  main -> main

PS> git ls-tree -r --name-only HEAD DemoEarlyWarningTool/
DemoEarlyWarningTool/DemoEarlyWarningTool.knwf
DemoEarlyWarningTool/README.md
DemoEarlyWarningTool/student_performance_knime.csv
DemoEarlyWarningTool/workflow.png

Working tree is synchronized with origin/main.
```

Figure 2. Git commit and push record

Recorded command results show the initial KNIME project commit, successful push to origin/main, and the required Demo folder files tracked by Git.

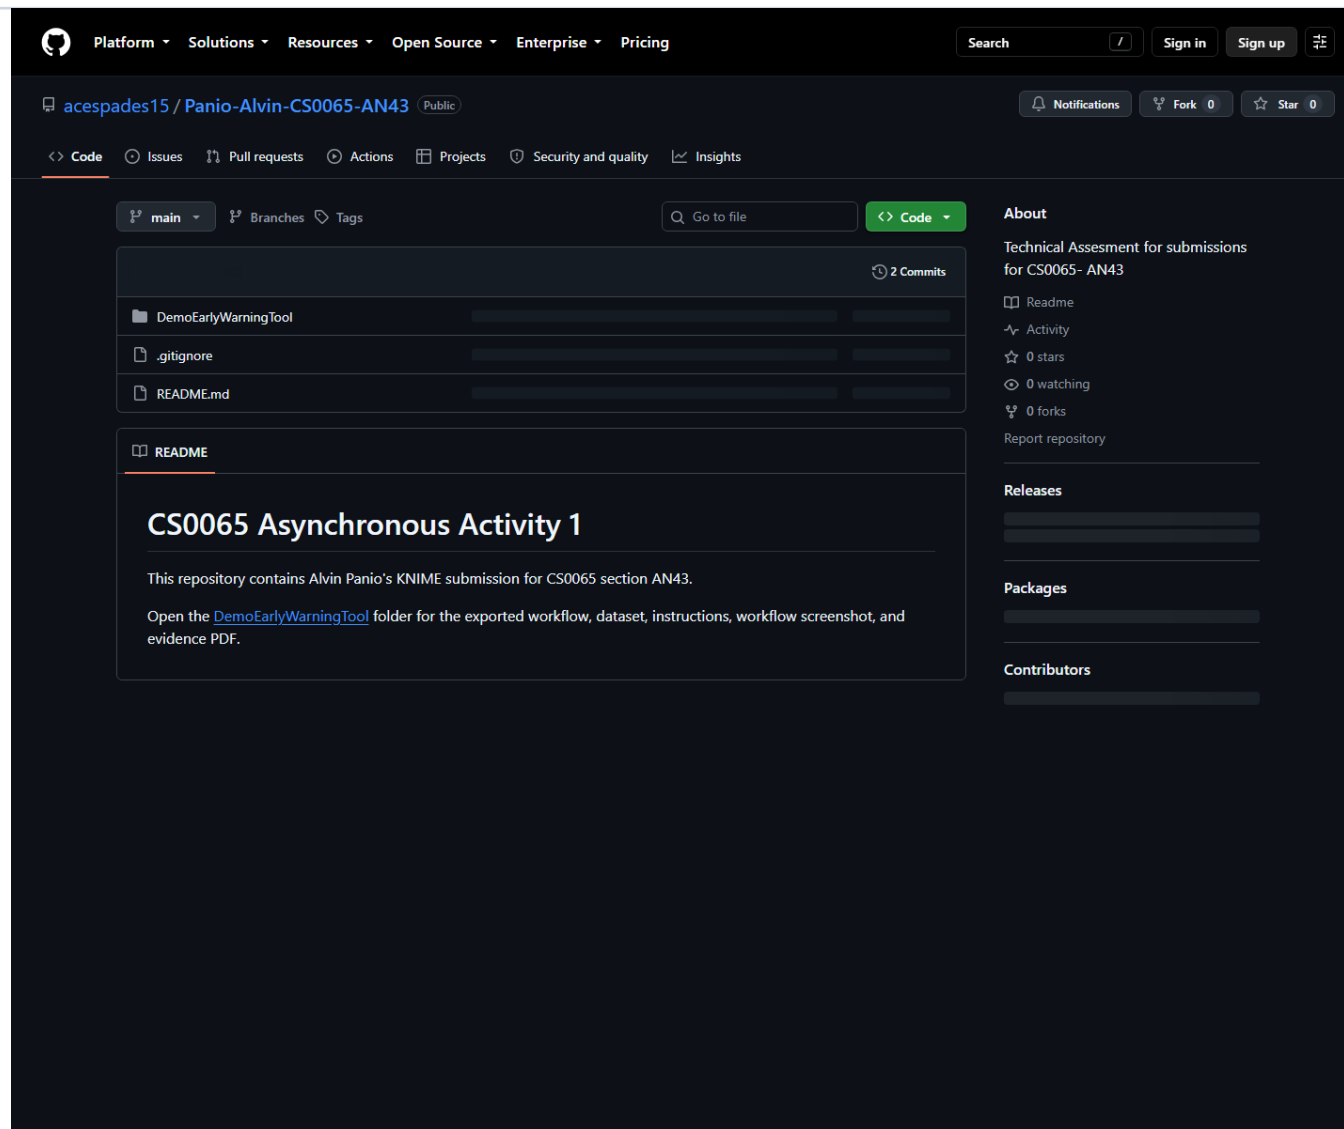

Figure 3. Public repository verification

The repository was opened with a fresh browser profile without signing in. GitHub displays the Public badge and the DemoEarlyWarningTool folder at the repository root.

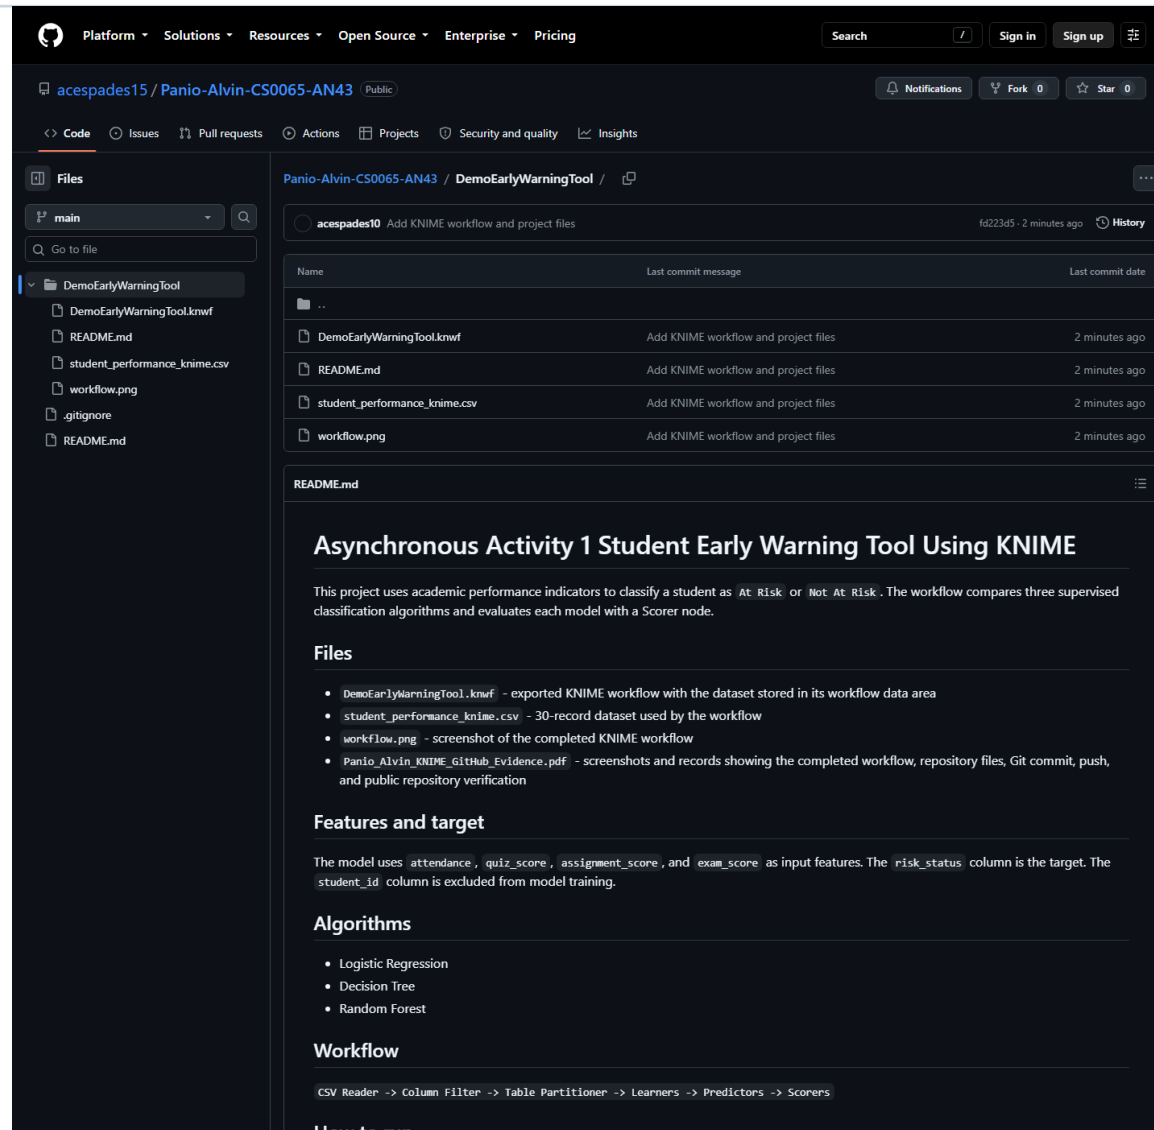

Figure 4. Demo folder after initial push

GitHub shows the exported .knwf file, README.md, dataset, workflow screenshot, commit message, and rendered project documentation.

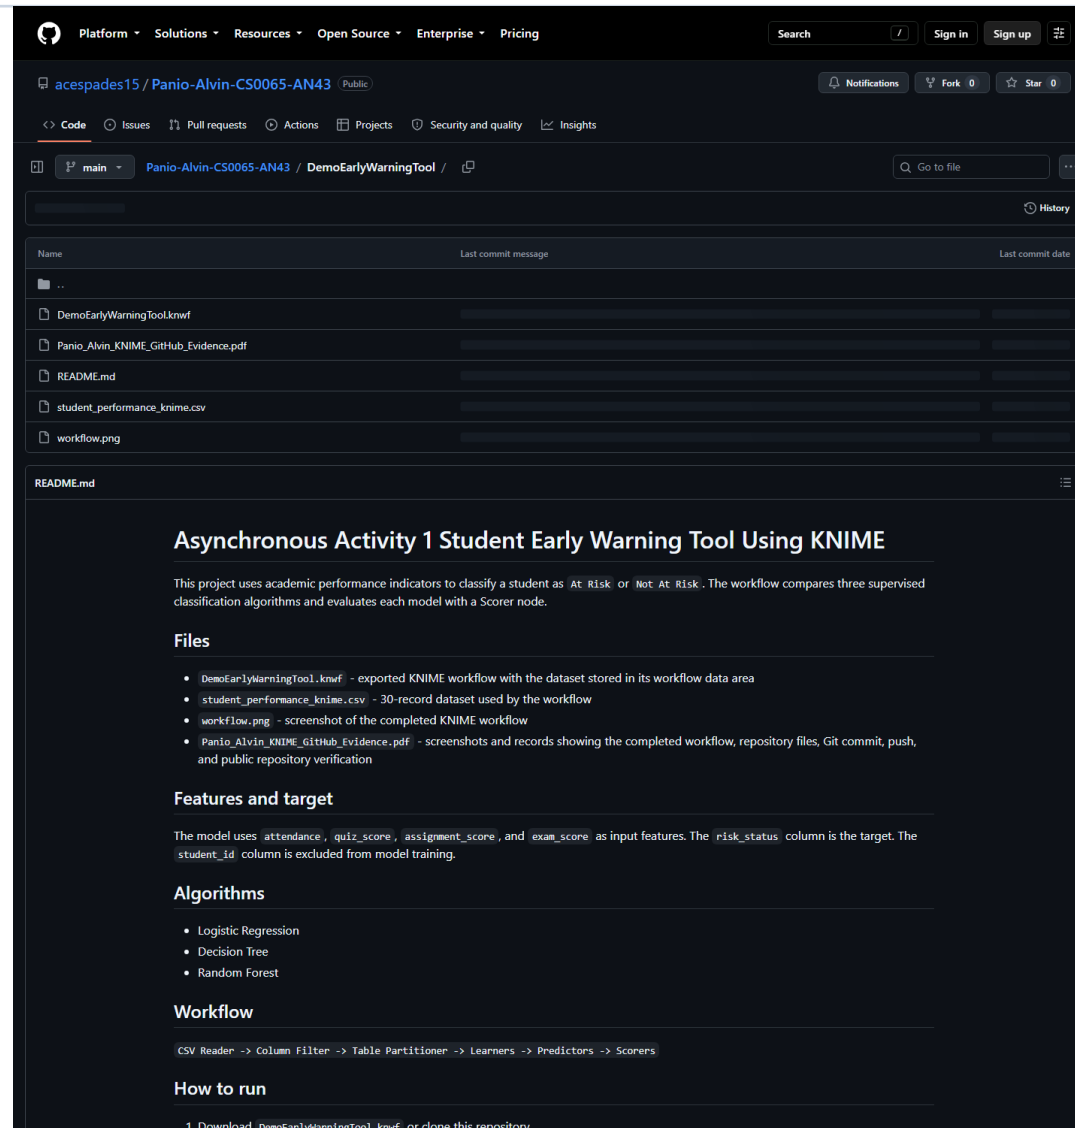

Figure 5. Final Demo folder with evidence PDF

After the evidence file was added and pushed, an anonymous browser session confirmed that the PDF appears in the Demo folder beside the KNIME workflow, README, dataset, and workflow screenshot.

Required deliverables verified

● Public repository	GitHub displays the repository as Public in an anonymous browser session.
● Demo folder	DemoEarlyWarningTool is visible at the repository root.
● Workflow	DemoEarlyWarningTool.knwf is a valid ZIP-based KNIME archive with workflow.knime.
● Portable dataset	The archive contains data/student_performance_knime.csv and uses a workflow-relative path.
● README	README.md identifies the workflow, files, algorithms, features, target, and run steps.
● Dataset	student_performance_knime.csv contains 30 records and the required six columns.
● Evidence PDF	This file is stored in the Demo folder and is opened again after the final push.

MS Teams submission is the remaining student-controlled step after this repository link is copied.
